## Projects

---

### Quiz App | HTML, CSS, JavaScript ☑

- **Responsive Design:** Ensured a seamless user experience across various devices and screen sizes using responsive web design principles and CSS media queries.
- **Scoring System:** Developed a scoring mechanism to track and displaying user's scores at the end of the quiz, including the number of correct answers and overall percentage.
- **Timer:** Integrated a countdown timer to add a time-bound challenge to the quiz, enhancing user experience.

### Weather Website | HTML, CSS, JavaScript ☑

- **Real-Time Weather Data :** Implemented real-time weather data fetching from a third party API , displaying current weather conditions , temperature, humidity and wind speed.
- **Search Functionality:** Added a search feature that allows users to enter a city name to get weather updates for their desired location.

### Portfolio Website | React.js, Bootstrap CSS

- **Component-Based Architecture:** Utilized React's component -based architecture to build reusable UI components, enhancing maintainability and scalability.
- **About me:** Designed an "About Me" section to provide an overview of professional background skills, and projects .
- **Styling and Theming:** Applied Bootstrap classes and custom CSS to achieve a professional and cohesive design , with consistent styling and theming.
